<b>Comments:</b>		

EMSL Analytical is strictly an analytical laboratory. We can analyze samples by various methods and provide you with a written report but cannot provide you with any advice as to how to proceed after obtaining results. Due to magnification limitations inherent in PLM, asbestos fibers in dimensions below the resolution capability of PLM may not be detected. The limit of detection as stated in the method is 1%. For assistance with interpretation of your results, you may call your local health department, visit the USEPA website at [www.epa.org](http://www.epa.org), or hire an environmental consultant.

If you would like EMSL to test your sample by PLM EPA Method EPA 600/R-93/116 please send us a sample of the material you want tested in a sealed zip lock bag (approximately 1 square inch is sufficient), and fill out the attached form. All orders must be prepaid. If you do not wish to use a credit card, include a certified check or money order in the amount that corresponds to the turnaround time you requested, multiplied by the number of samples you submit. Please refer to [www.epa.gov/asbestos/pubs/ashome.html#6](http://www.epa.gov/asbestos/pubs/ashome.html#6) for more information regarding asbestos in your home. Not all services and/or tests are offered at every EMSL laboratory location. Please contact your local EMSL laboratory to confirm their ability to provide the service/test that you require.
